

CNT SERIES - CARGO NET NINJA BAGS

JAMMAR MFG

The CNT Series Indoor Cargo Net Ninja Bags are a high quality net bag designed and fabricated to mimic a very popular American Ninja Warrior obstacle. The CNT bags are handcrafted entirely using 1/2", 5/8", or 3/4" diameter poly Dacron rope, available in white, black, or tan color. The bags squares are constructed using a 3-pass weave design and are offered in a 4" or 9" square mesh. The bag includes rope loops on the top to allow for easy installation.

The CNT Series nets are designed to be installed over foam pits or other soft landing surfaces which will avoid injury if participates fall off. The bags can be used individually or in multiples. The bags are designed to be filled with stuffing such as foam cubes or blankets to form the shape of the bag. All stuffing is supplied by others and is not included with the cargo net bag. A Foam Containment Bag (FCB-308) can be ordered separately to help keep foam uniform and contained within the bag (recommended for 9" square mesh nets).

The CNT Series nets must be hung from structurally safe framework which far surpasses any weight put on the bags. Jammarmfg offers a CNT Series hanger which is threaded through the top loops of the net and connects with a 1/2" quick link. The quick link can be connected to the hanging hardware chosen. For bags intended for swinging purposes, upgraded specialty hardware is required.

All CNT Series nets are supplied with detailed installation instructions, care, and use documentation. Always inspect equipment and hanging hardware before and after each use.
