

MLBH-1 ROPE HOIST WITH METAL LOCK BOX

JAMMAR MFG

PRODUCT SPECIFICATION

The MLBH-1 Rope/Net Hoist with Metal Lock Box is a manual hoist system to raise climbing ropes, cargo nets, or other climbing components to the wall or ceiling to prevent unauthorized use or to get the equipment out of the way of other activities. The hoist system is supplied with a metal lock box to avoid unauthorized use.

The MLBH-1 is a complete kit supplied with one wall cleat metal lock box assembly, one wall pulley assembly, and one 60' rope assembly with a weighted end for easy use. The system is capable of raising 70 pounds (equivalent to 1 cargo net or 2 climbing ropes). The MLBH-1 metal box and pulley assemblies are equipped with wood stringers to allow for easy installation on the wall. All wall anchors are supplied by others.

To operate, simply connect the rope to the climbing net or rope and manually pull the equipment to the ceiling or wall. Once at the desired height, tie off the rope to the wall cleat and secure the box.

Jammar recommends including the optional signage (SIGN-1) to deter unauthorized use and/or misuse of the equipment.

OPTIONAL EQUIPMENT:

- SIGN-1 Wall Signage

WALL PULLEY ASSEMBLY

60' HOIST ROPE WITH WEIGHT

WALL CLEAT METAL LOCK BOX ASSEMBLY

OPTIONAL WALL SIGNAGE
