

WGC-20 WALL GRID CLIMBER

JAMMAR MFG

PRODUCT SPECIFICATION

The WGC-20 Wall Grid Climber is a permanently mounted climbing apparatus ideal for developing physical fitness, strength, and coordination. The climber is constructed of 1 5/16" O.D. steel tubing fully welded together to create a 30" wide by 45" tall climbing grid; 4 x 5 rows with a 6" grid pattern. The climber assembly attaches to a structural wall utilizing heavy-duty steel mounting plates. All wall anchors are to be specified and supplied by others; 1/2" diameter hardware minimum. Jammarmfg recommends mounting the climber at least 6'-6" above the finished floor; measured to the bottom horizontal bar. The WGC-20 is supplied in a durable black powder coat textured finish for safety. The entire assembly weighs 72 lbs.
