WML-100 WALL MOUNTED GYM LADDER

The WML-100 Wall-Mounted Gym Ladder is a permanently mounted climbing apparatus ideal for developing physical fitness, strength, and coordination. The ladder is constructed of a fully welded steel frame with inner braces for lateral support and heavy duty chain for vertical support. The entire assembly is attached to a structural wall with 6 independent wood stringers which are included with the ladder assembly. All wall anchors are to be specified and supplied by others. The ladder is approximately 18" wide by 12' long and extends approximately 48" from the wall. The WML-100 is supplied in a durable black powder coat textured finish for safety. The entire assembly weighs 187 lbs.
